

Small-scale production system

Iris Series

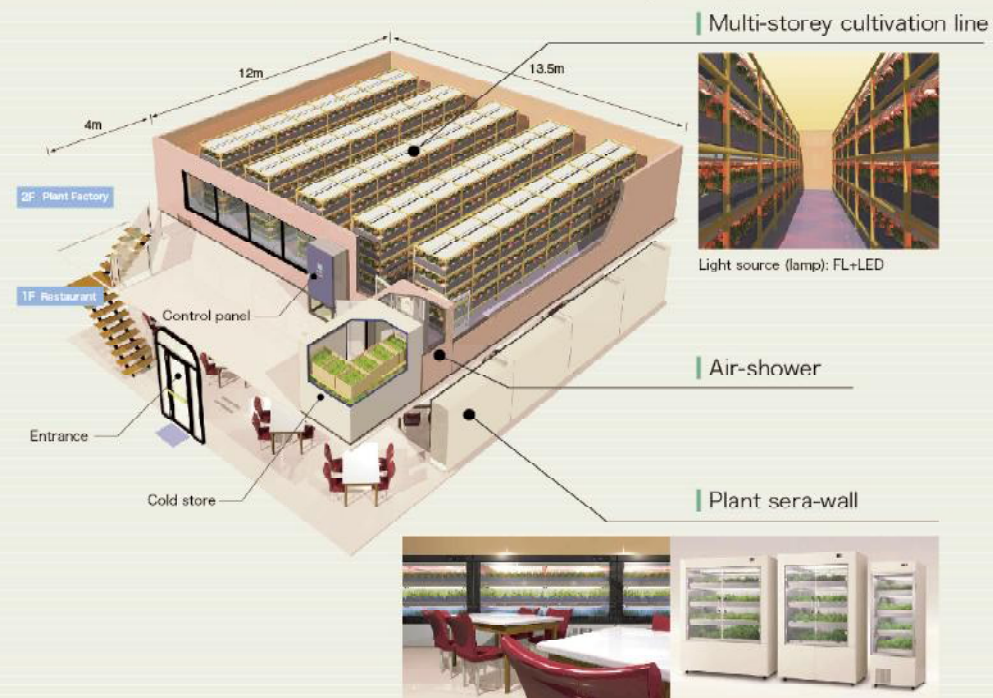

We provide a small yet excellent system to be installed at restaurants or shops to allow fresh vegetables to be provided on the spot. Besides use at the backyard, the stylish exterior can be used as display also.

A small and excellent system suitable for installation in restaurant or shop.

Example of products Indoor-assembled cultivation device + Showcase type mini-plant factory

TAPSH-1 Indoor type

- ▶ Prefabricated and free layout to suit location to be installed in.
- ▶ As the cultivation system is horizontal, it is also possible to be used for tomatoes and other fruits.
- ▶ No chemical fertilizer is used, and cultivation is in clean-room, so washing is not required.
